APPL. NO. 09/838,223  
Response to Office Action of 5 May 2005 & Notice  
of Non-Compliant Amendment dated 6 May 2005

**II. Please replace the ABSTRACT with the following amended**

**ABSTRACT:**

An auxiliary device for editing documents comprises a Windows<sup>®</sup> operation PC system peripheral input device and a modular key set with document editing functions. The modular key set is arranged on the Windows<sup>®</sup> operation PC system peripheral input device and connected to an I/O bus of the single-chip microprocessor. Therefore, a user can directly use the modular key set to edit documents without invoking chording key combinations or heavy use mouse.
